P2: Quasai Object

Proposal:

For P2, the word “artifact” in the project descripton immediately made me think of objects that have sentimental value to me. The objects that came to mind were a stuffed cat I have had for years, a rusty doorstop in the shape of a bunny from my grandparents, or a glass lamp that I have kept with me every time I moved to 3 different cities now, somehow not breaking. Although I took reference photos for and attempted to model of all the objects, I decided for my final to focus on the lamp, not only because it was the least complex shape (big plus) to model, but also creating a glass texture seemed interesting with the rope inside the lamp.
