P2: Quasai Object

Proposal:

For p2, I had a couple ideas for “artifacts” that I could model and bring to life. Trying to model all of them was fun but for my final, I decided to hone in on the glass lamp
because I thought the glass would be interesting to texture.

While making my final I ended up looking at a tutorial for animated grass which gave me some good info on keyframing, which I then used when I downloaded a model + animation from Khada Model Viewer.

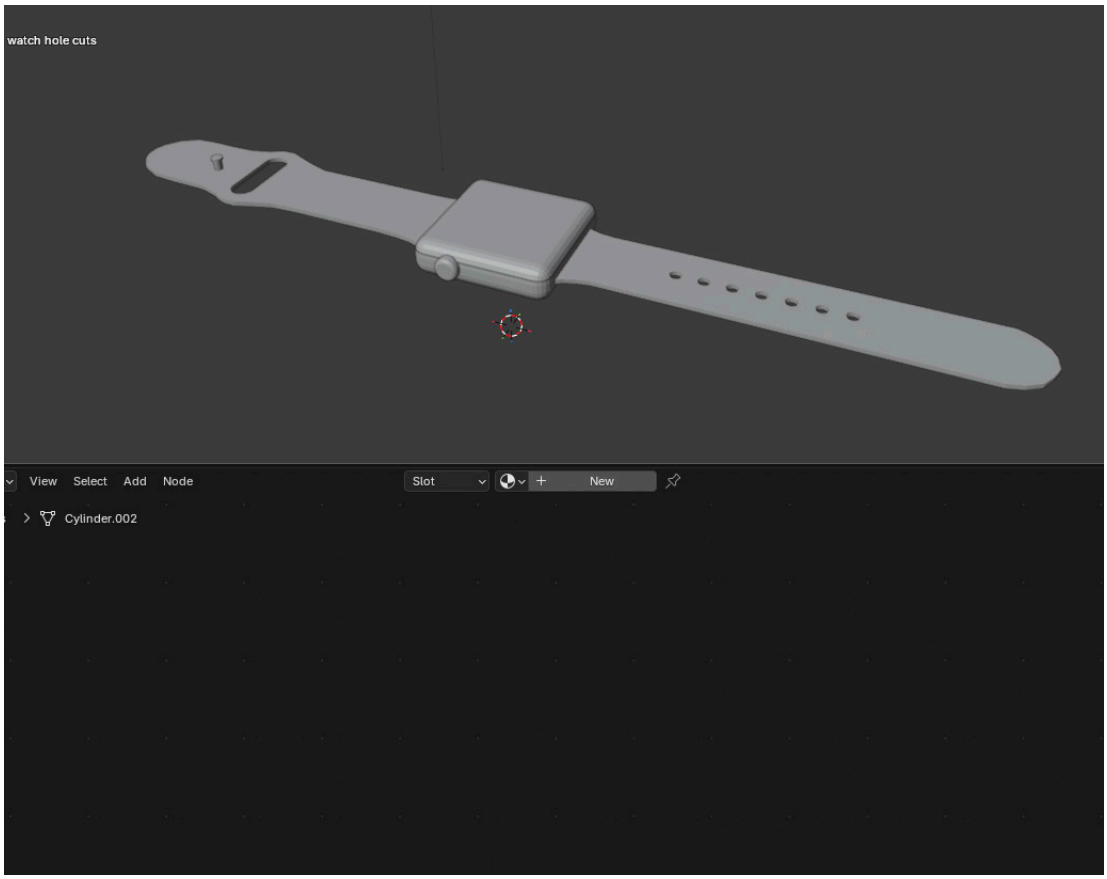

References:

Drafts:

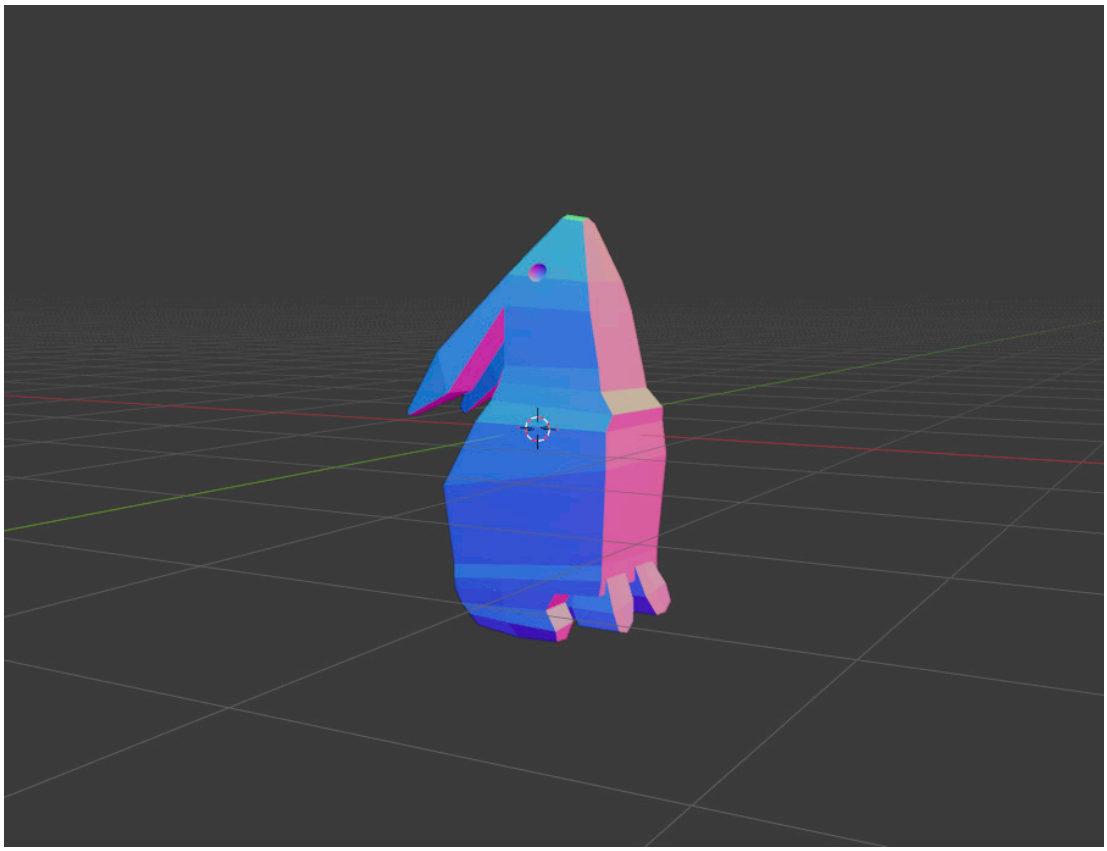

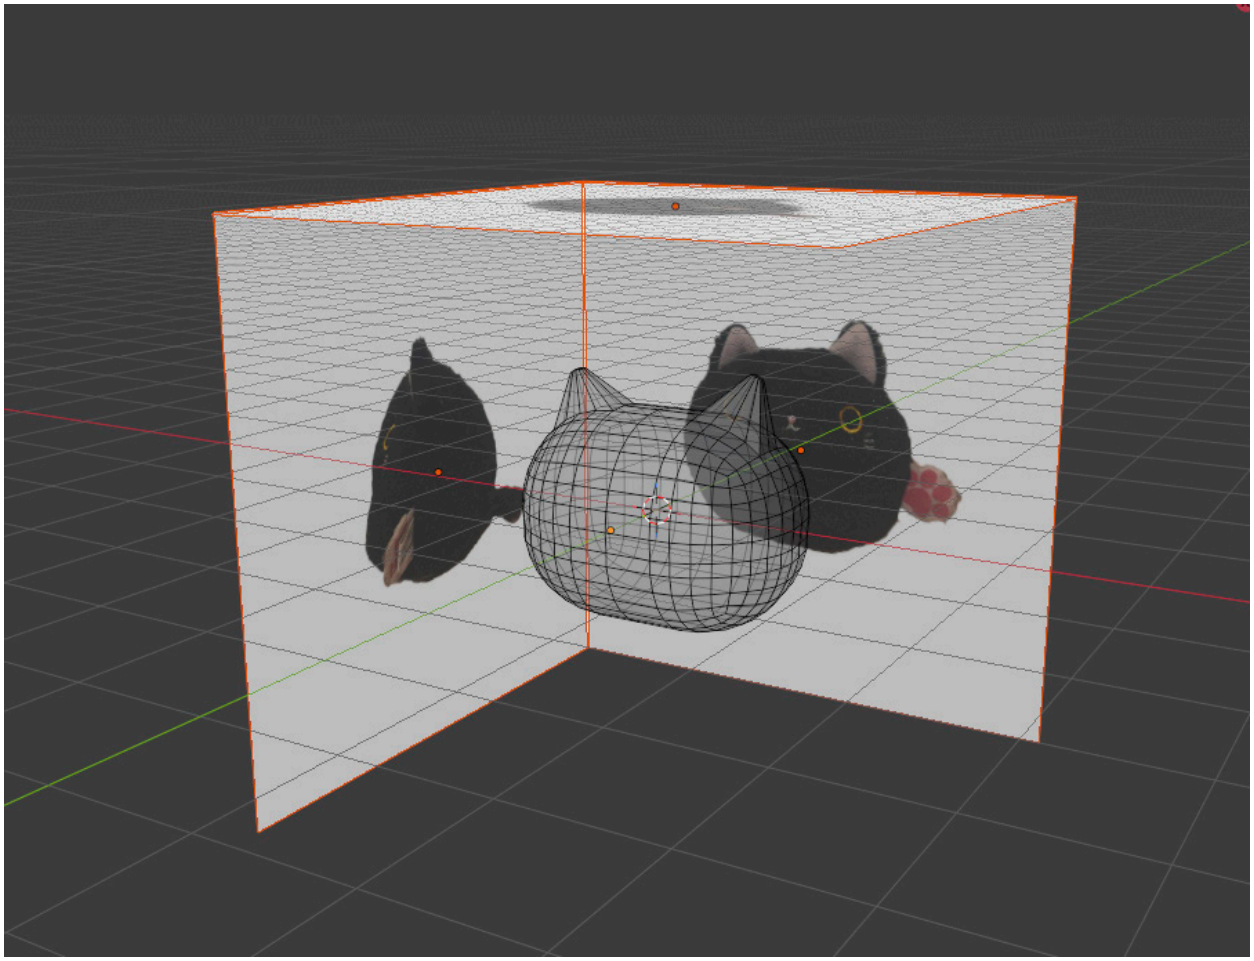

*learned a lot making this model! Both the bevel tool and boolean modifier are so powerful.

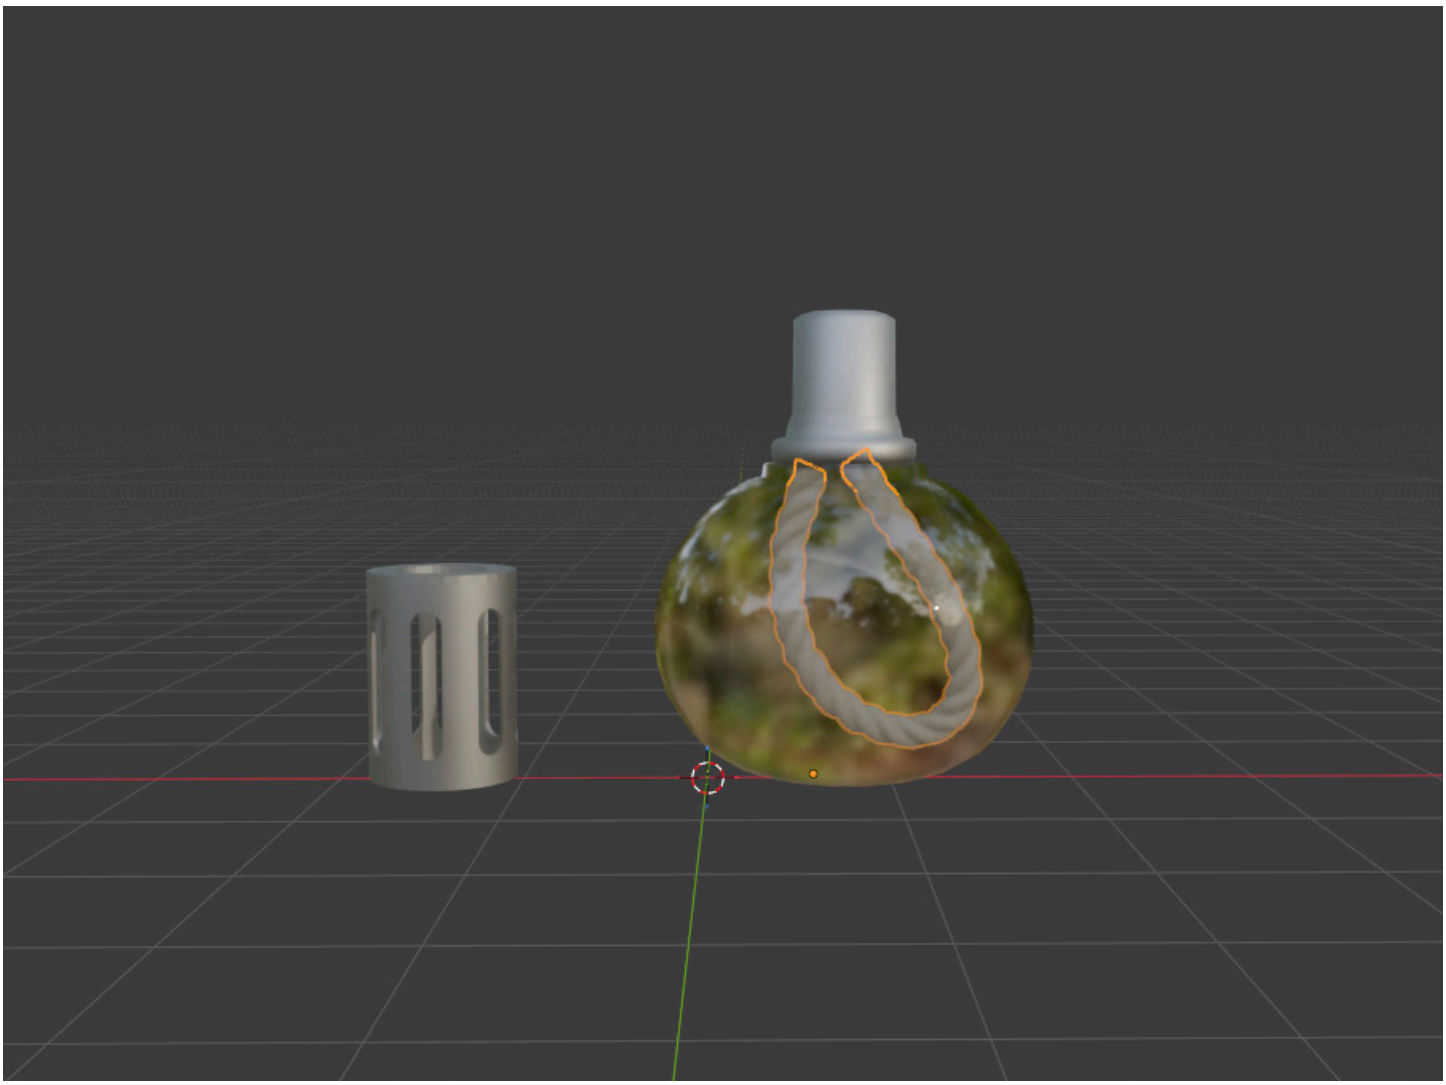

Final:

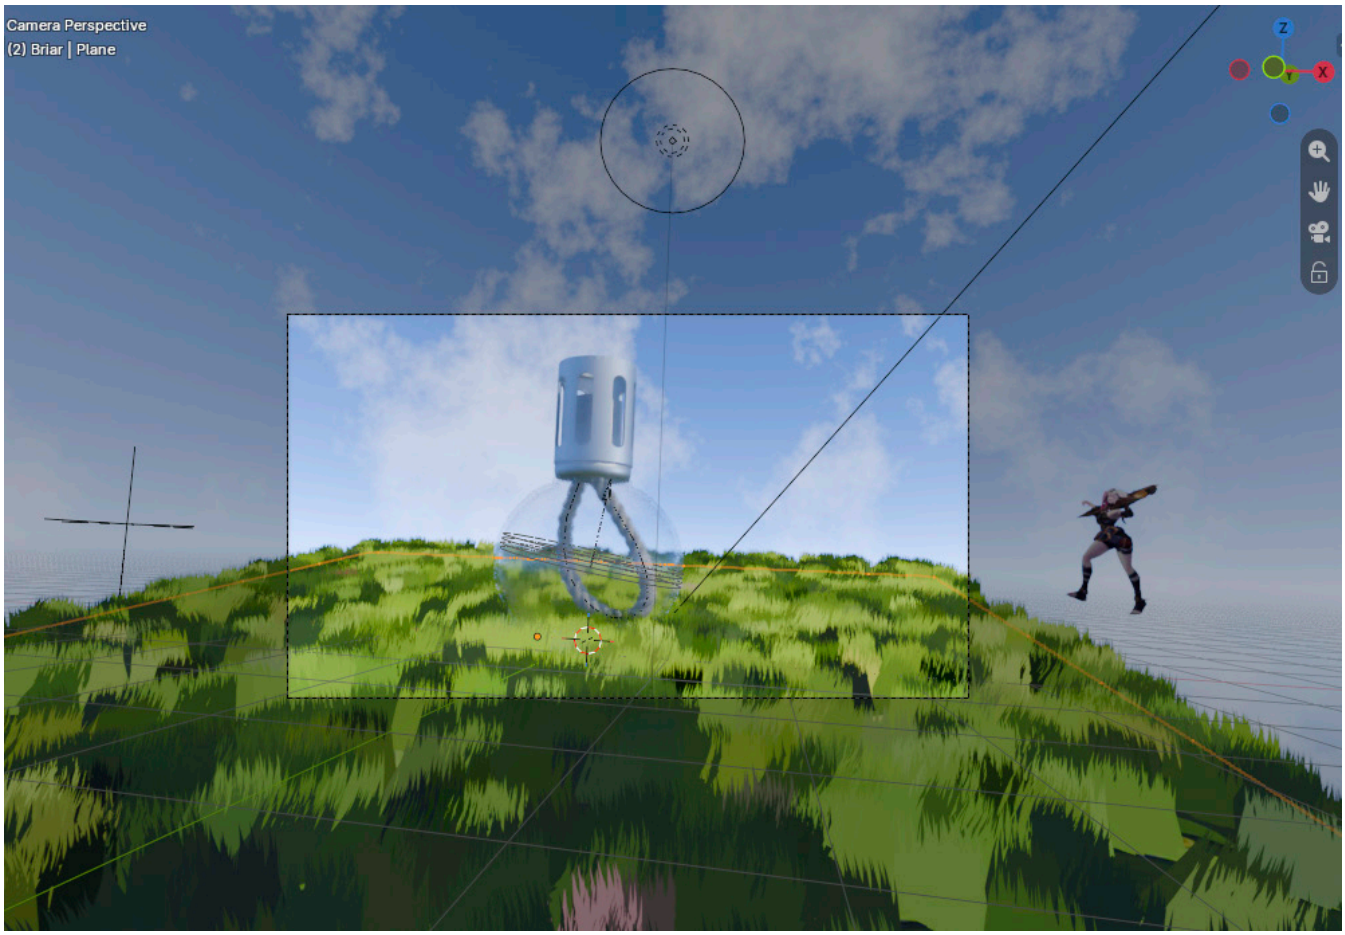

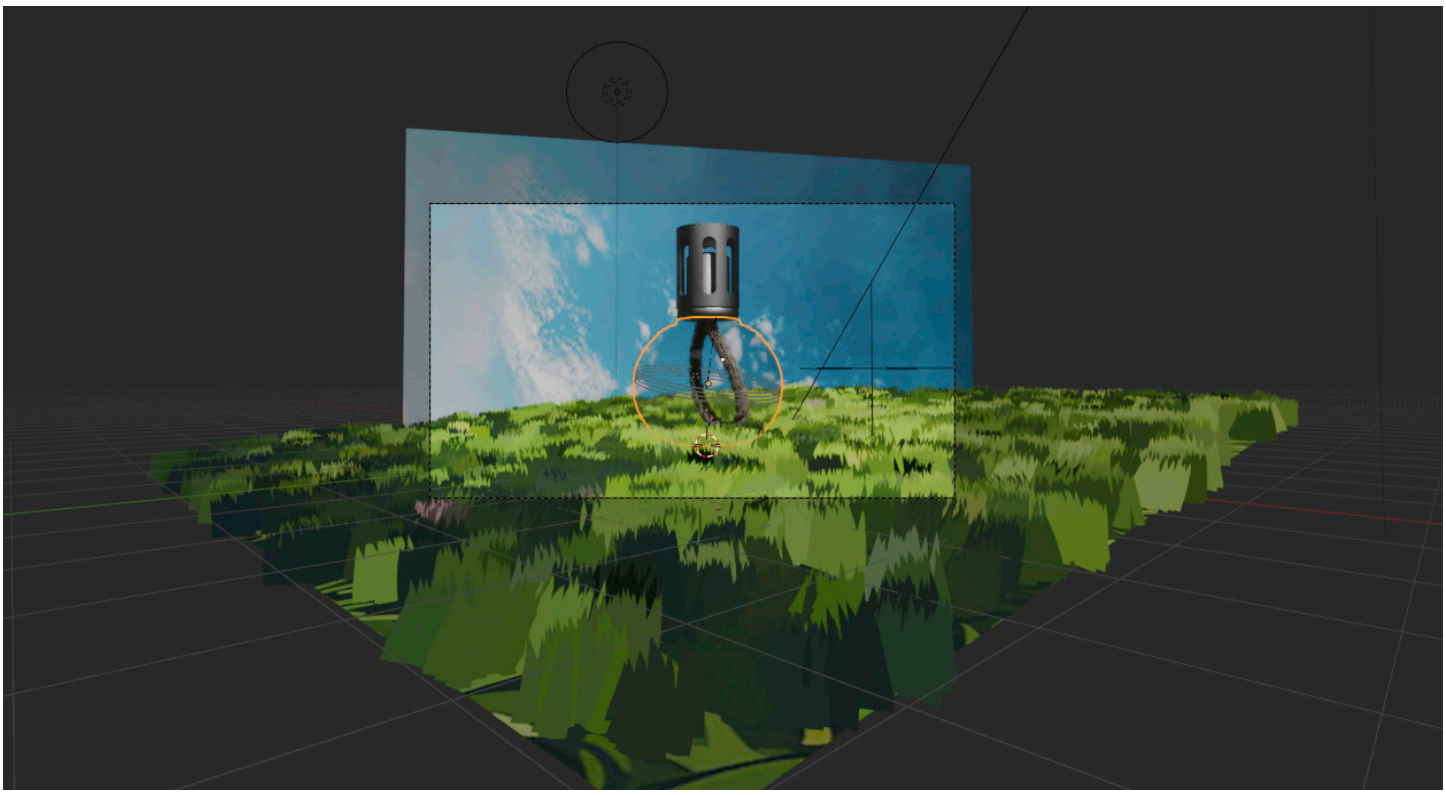

Animation on site!

https://yotsaaa.github.io/10c-churchill/

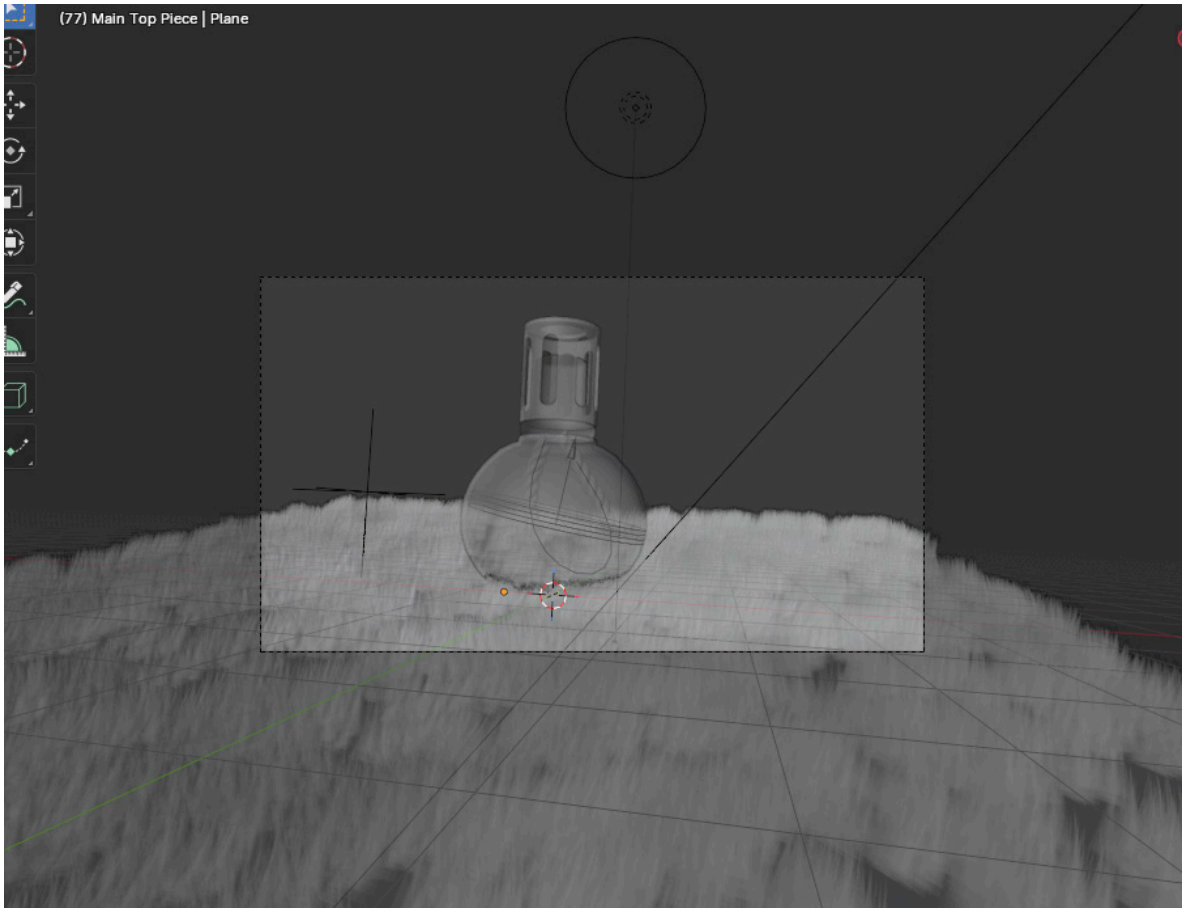

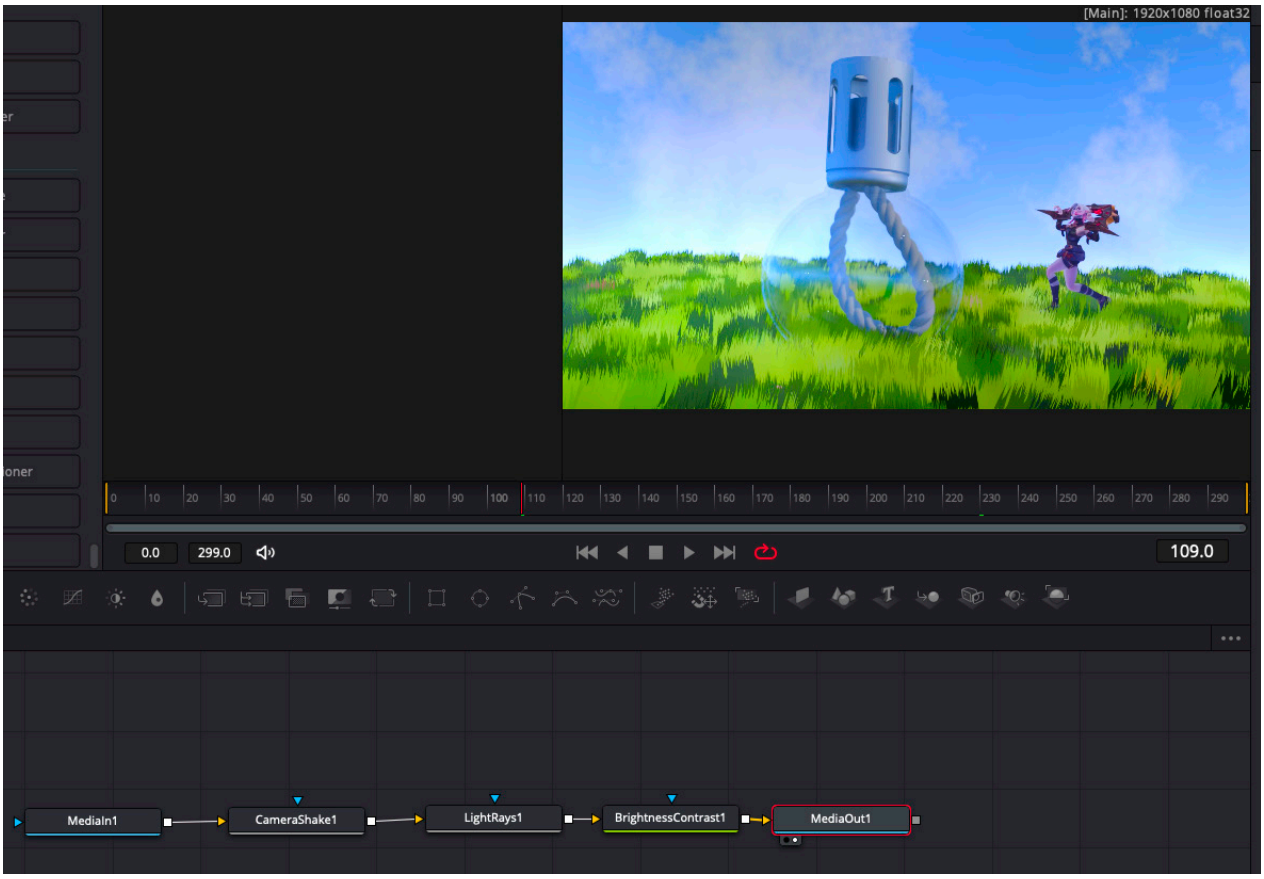

*Final model with cap removed

*I did eventually figure out how to add a skybox lol.

*Some quick adjustments w/ fusion.
